ABOUT ME

Senior Mobile Software Engineer with 4+ years of experience developing cross-platform applications using Flutter and .NET MAUI.

Experienced in designing, developing, publishing, and maintaining production mobile applications on Apple App Store and Google Play Store.

Strong background in mobile architecture, REST API integrations, offline-first applications, state management, push notifications, barcode scanning systems, and enterprise software development.

Passionate about building scalable, maintainable, and user-focused mobile experiences.

WORK EXPERIENCE

AreonX – Ankara, Türkiye

Mobile application developer

[27/04/2026 – Current]

AreonX – Mobile Dungeon Crawler Game (Dungeon Infinity X)

Cross-platform mobile dungeon crawler developed as a solo frontend engineer using Flutter. Features procedural dungeon generation, turn-based combat, progression systems, achievements, live content updates, and long-term retention mechanics for Android and iOS.

Responsibilities

- Designed and implemented the complete mobile frontend architecture from concept to production.
- Developed core gameplay systems including combat, progression, skills, equipment, achievements, rewards, encounters, and dungeon exploration.
- Built responsive mobile UI/UX optimized for multiple screen sizes and device types.
- Implemented procedural dungeon generation and floor progression systems.
- Developed automated balance simulation tools capable of running thousands of gameplay simulations to validate progression, economy balance, combat difficulty, and retention metrics.
- Created JSON-driven content pipelines enabling rapid balancing and content iteration without major code changes.
- Designed and implemented inventory, equipment, skill, merchant, reward, curse, and encounter systems.
- Integrated Shorebird live update infrastructure for production patches and hotfixes without full store releases.
- Optimized performance, memory usage, rendering efficiency, and mobile responsiveness across Android and iOS.
- Implemented rewarded advertisement and monetization workflows.
- Collaborated on backend planning and API contract design for future online services and player progression synchronization.
- Managed production builds, testing workflows, QA processes, deployment pipelines, and release preparation.

Technologies

Flutter • Dart • Flame Engine • Shorebird • REST APIs • JSON Configuration Systems • Mobile Game Architecture • Procedural Generation • State Management • Android • iOS • Google Play Console • App Store Connect

Key Achievements

- Developed the entire frontend codebase as a solo engineer.
- Built a scalable architecture supporting rapid content expansion and balancing.
- Created automated simulation tools for large-scale gameplay testing and balancing.
- Established an OTA live patching pipeline without requiring full store submissions.
- Delivered a production-ready cross-platform game architecture supporting future backend integration and live operations.

Mobile application developer

[21/12/2022 – 22/12/2025]

Mobile Application Developer — CAVAMED A.Ş. (2022–2025)

- Sole front-end engineer responsible for delivering two enterprise healthcare applications (CAVAMED, ERPIMUS) used in real-world inventory and warehouse operations.
- Designed and implemented scalable front-end architecture using Flutter and .NET MAUI, improving maintainability and reducing feature development time.
- Built complex data-driven interfaces (DevExpress DataForm/DataGrid) with advanced filtering, significantly improving user efficiency in operational workflows.
- Implemented high-performance barcode/QR scanning (ZXing, Camera2), optimized for low-light and small-code detection scenarios.
- Developed role-based UI systems aligned with backend RBAC logic, improving security and user segmentation.
- Improved application performance through caching, virtualization, and payload optimization, resulting in faster load times and smoother UX.
- Managed full mobile release lifecycle (CI/CD, signing, store deployment) across Google Play, App Store, and Huawei AppGallery.

SKILLS

Languages & Frameworks

Flutter(Dart) / C# (.NET MAUI, Xamarin)

Backend & Database

Supabase / PostgreSQL / REST APIs

Mobile Engineering

Deeplinking / Push Notifications (FCM/APNS) / Barcode/QR scanning (ZXing, Camera2) / Offline-first architecture

Architecture

RBAC / Clean Architecture / State Management (Riverpod)

Tools & DevOps

Git / CI/CD / App Store, Google Play Console & Huawei Connect Deployment

EDUCATION AND TRAINING

Bachelor of Science (BSc) in Biomedical Engineering

TOBB University of Economics and Technology (TOBB ETÜ) [10/09/2014 – 18/12/2023]

City: Ankara | Country: Türkiye | Website: <https://www.etu.edu.tr/en> | Level in EQF: EQF level 6

- Focus on medical devices, signal & image processing; senior mobile front-end relevance: healthcare workflows & data integrity.

PROJECTS

[01/02/2026 – Current]

DuruGlobal — Real Estate Mobile Platform • Built a full-stack real estate platform (mobile + web) targeting international markets (Dubai). • Designed backend architecture using Supabase (PostgreSQL + RLS), including role-based access control and moderation workflows. • Implemented deep linking (App Links / Universal Links) and push notifications (Firebase/APNS). • Developed multi-language support (TR/EN/DE/AR) and scalable onboarding flows. • Handled media uploads, listing management, and real-time data interactions.

Links: venturecapitalsdg.com | <https://apps.apple.com/ca/app/duruglobal/id6759501423> | <https://play.google.com/store/apps/details?id=com.venturecapitalsdg.mobile>

[01/01/2026 – Current]

Desk4Dent: Dental Clinic Management • Developed a production-ready healthcare application used by a private dental clinic. • Built features for appointment scheduling, patient management, and treatment tracking. • Implemented Supabase backend (auth + PostgreSQL + RLS security). • Integrated push notifications using Firebase Cloud Messaging. • Designed scalable state management using Riverpod.

Links: <https://desk4dent.com/> | <https://apps.apple.com/ca/app/desk4dent/id6759098204>

[Current]

Mice and Paws: Cat Game • Developed a 2D mobile game with 60 FPS animations and collision systems. • Implemented sprite animations, hit-testing, and sound effects. • Integrated Google Mobile Ads for monetization. • Designed offline-friendly gameplay loops.

Personal Website (Portfolio) Designed and deployed a responsive personal portfolio website to showcase my mobile and web projects, app store links, and contact information. Focused on clean UI, fast loading, and a maintainable structure so I can update content quickly. Includes sections for projects, skills/tech stack, and direct contact.

Personal / Business Website Built and published a simple, responsive website for a client to present profile/services and provide clear contact access. Implemented a clean layout optimized for mobile, with easily editable content. Delivered a live URL and ensured the site works reliably across devices.

LANGUAGE SKILLS

Mother tongue(s): Turkish

Other language(s):

English

LISTENING C1 READING C1 WRITING C1
SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1

Dutch

LISTENING A1 READING A1 WRITING A1
SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

RECOMMENDATIONS

Name: **Asim Kalyoncu** | ORYAZ(Ordu Yazılım A.Ş.) Team Leader, Senior Flutter Developer
I have known Buğra for several years and I've had the opportunity to review his projects and discuss his approach to software development. He is a dedicated and capable mobile developer, particularly strong in Flutter and cross-platform solutions. Buğra learns quickly, writes well-structured code, and pays close attention to UX details and performance. What stands out most is his passion for the work—he takes true ownership, iterates thoughtfully, and consistently pushes for high quality. I confidently recommend him for mobile development roles, especially Flutter-based projects.
